

As the final dissemination event of the EU-funded **PEACHD Project*** we will co-produce the 22nd Annual INEBRIA* Meeting, to be held in Prague, Czech Republic, from **Wednesday 14th October – Friday 16th October 2026**, under the title:

“INEBRIA-PEACHD 2026

Health promotion through brief interventions: Broadening the scope to communities and lifestyles”

Bringing together researchers, clinicians, policymakers, public health practitioners and community actors, the conference will provide a high-level forum for advancing evidence and practice in screening and brief interventions (SBI) for alcohol and other substances, and other lifestyle risk factors, especially in the prevention of cancer and other NCDs. The conference will showcase the PEACHD Project outcomes -piloting SBI for multiple cancer risk factors in different settings, based on the WHO BRIEF approach- alongside and in synergy with innovative ongoing research and practice, implementation strategies, and policy-relevant tools addressing alcohol and other interacting lifestyle and behavioural risk factors; included through an abstract submission and selection process. With a strong scientific programme and a fully in-person format designed to maximise engagement, the conference will offer plenary sessions, parallel workshops, and opportunities for interdisciplinary exchange within the historical seat of the Charles University, Prague, in the heart of central Europe.

Beyond sharing results, the INEBRIA-PEACHD 2026 Conference will be forward looking and endeavour to inspire sustained collaboration and action. By highlighting SBI for multiple risk factors within a contextualised health promotion perspective, the conference aims to respond to real-world complexity and the needs of diverse populations, including people with lower socioeconomic status, migrants, displaced communities and others; and to contribute to tackling the health inequalities faced in Europe.

Key topics and areas in focus at the INEBRIA-PEACHD 2026 Conference:

- **Outcomes and impacts:** including the role of SBI in prevention of cancer and other NCDs
- **Broader interventions:** Going beyond alcohol to address multiple risk factors
- **Tailoring and embedding approaches for brief interventions** in different contexts, including participatory research and co-created interventions
- **Training new professional profiles** to deliver brief interventions
- **Working with end user population groups living with disadvantage** to reduce inequity
- **Hard to reach groups:** e.g., those with migrant, refugee status and living with lower SES, among others

Practical information for the Conference:

- **Structure:** (NB: the main event will run from lunchtime Wednesday 14/10 to lunchtime on Friday 16/10):
 - o *Pre-conference meetings: Wednesday 14/10/2026 – 8:30h – 13h*
 - o Conference Day 1: Wednesday 14/10/2026 – 14h – 17:30h
 - o Conference Day 2 (including official opening session): Thurs 15/10/2026 – 8:30h – 17:30h
 - o Conference Day 3: Fri 16/10/2026 – 8:30h – 13h (lunch provided)
- **Location:** [Karolinum Centre](#) (Address: Ovocný trh 560/5), Prague, Czech Republic
- **Capacity:** Given the venue capacity, the conference expects to host around 150 engaged participants.
- **Fees:** No fee will be charged for conference participation (which does not include the social dinner or any individual accommodation, travel costs or other expenses related to attendance). Pre-registration is mandatory due to finite venue capacity; participation cannot be guaranteed, and a formal commitment will be required to attend.

Registration process:

- o **Pre-registration** will be open from **18 February – 15 April** [[LINK HERE](#)]
- o In case of interest beyond capacity, priority will be given to those actively contributing to the conference and ensuring its impact
- o Confirmation of participation from the conference organisers is planned for mid-May
- o Registered participants will be required to formally commit to attending the event through a simple online format.

Call for Abstracts:

- o **Abstract submission is through the pre-registration form** [[LINK HERE](#)]
- o Each participant can submit up to two abstracts for different formats in the pre-registration form (click this link to download the [guidelines and template for abstract submission](#))
- o An abstract may be submitted for oral presentations, symposia, workshops or posters (and we also welcome innovative communication formats), according to the abstract submission guidelines (downloadable in the online form)
- o **Abstract submission period: 18 February – 15 April**
- o Presenters will be notified of the abstract submission outcome (along with confirmation of registration) by mid-May.
- o In order to encourage diversity in the programme, and maximise knowledge sharing and exchange of ideas, the scientific committee will aim to maximise the number of groups' work represented.

PEACHD (Piloting European Action on Cancer Health Determinants) is an EU-funded Action Grant focussed on primary prevention of cancer, which will operationalise and adapt the **WHO-EU BRIEF approach** to reduce risky lifestyle behaviours, such as alcohol use, smoking, unhealthy diet and physical activity. The project develops, tailors and pilots large-scale implementation strategies for screening and brief intervention on multiple modifiable lifestyle behaviours, with special attention to people with low socioeconomic status, migrants, and Ukrainian refugees, in three European countries: Czech Republic, Poland and Spain.

PEACHD (Grant Agreement No. 101129260, www.peachd4health.eu) is (Co-)Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or HaDEA. Neither the European Union nor the granting authority can be held responsible for them.

INEBRIA (International Network on Brief Interventions for Alcohol and Other Drugs) is an international network of researchers, policy makers, practitioners and other stakeholders interested in the potential of brief interventions in health and other settings to reduce the harms produced by alcohol and other drug use. It aims to provide global leadership in the development, evaluation and implementation of evidence-based practice in the area of early identification and brief intervention for hazardous and harmful substance use. <https://inebria.net/>
